

Who Is Forneus?

Posted on May 30, 2025 by Rhyan Hyroc

There are spirits whose arrival announces itself like a storm. And then there is Forneus—who emerges not with thunder, but with the quiet, immense gravity of the ocean itself. When he comes, he does not speak. He listens. He surrounds. He envelops. He sinks into the soul like salt into water, dissolving fear, shame, and confusion into stillness and truth.

Forneus is one of the 72 spirits of the Ars Goetia, known as a **Great Marquis of Hell**, yet what he governs is not terror or conquest—it is eloquence, dignity, and emotional integrity. His domain is not fire, but water. And more specifically, the **deep waters**: the hidden layers of identity, language, memory, and reputation. His is not a power of spectacle, but of **energetic silence, emotional persuasion, and internal command**.

To understand Forneus is to step into a current of transformation that flows inward before it ever moves outward. His power does not impose. It **restores**. Those who call upon him do not demand—they are gently reminded of what they truly are beneath the bruises of opinion, the wounds of the past, and the masks of adaptation. He brings us back to the center of our name—our true tone—and teaches us how to carry it with strength, compassion, and precision in every conversation, dream, and presence.

The Form and Presence of the Depthcaller

When Forneus makes himself known in dream or vision, the forms he may assume often defy easy description. The most common manifestations include:

- **A vast tentacled being**, neither grotesque nor monstrous, but elegant and fluid, like a colossal cephalopod made of smoke and moonlight
- **An armored leviathan**, gleaming and quiet, crowned with coral or deep-sea

stone

- **A faceless scribe beneath the ocean**, writing sigils in the water with ink that disperses like cloud trails, only to reform moments later

Yet in every appearance, he emits the same field: **an emotional pressure that silences the mind, opens the heart, and compels truth without force.**

Unlike spirits of fire or storm, Forneus is not theatrical. He does not seek to impress or overwhelm. His presence is slow, sacred, and **unshakable**. He draws you in. He teaches by immersion. He reveals not through declaration, but through resonance.

Why Forneus Now?

In a world where identity is often fractured by noise—where words are shouted more than spoken, and reputations can rise or fall in a moment—Forneus offers a rare gift: **restoration of sacred inner voice.**

Those who find themselves called to him often face some of the following:

- A name that has been **tarnished, misunderstood, or distorted**
- A history of **social rejection, public humiliation, or gossip**
- The pain of **feeling unseen, unheard, or misrepresented**
- Deep **shame stored in the body**, especially around speaking, expression, or emotional vulnerability
- The longing to **speak foreign tongues**, connect with ancestral names, or unlock **dormant linguistic talents**

- The desire to **write with clarity, to speak with presence, or to lead through resonance rather than dominance**

Forneus comes not to fix these conditions with a wave of power—but to **empower the initiate to transmute them.**

Through emotional attunement and the sacred rhythm of his 21-day ritual path, the wounds of shame become wells of wisdom. The ruins of reputation become the roots of restoration. The softest voice becomes the most stable sound in the storm.

Domains of Influence

Forneus is the **patron of many paths**, all of which converge at the place where identity, expression, and memory meet. His gifts include, but are not limited to:

- Emotional healing, especially tied to speech, shame, or public failure
- Teaching of **foreign languages**, both modern and ancient
- Guidance in **dreams**, particularly emotional insights hidden beneath symbols
- Support in writing, speaking, publishing, and **clear verbal expression**
- Restoring **dignity and name** after social ruin
- Soothing **panic, anxiety, and speech blockages**
- Revealing **ancestral memory or forgotten soul names**
- Strengthening intuition in emotionally complex environments

- Enhancing the **power of persuasion without manipulation**
- Connecting the practitioner to **oceanic intelligences** and deep psychic ecosystems

But these gifts are not handed over. They are **earned through rhythm, silence, and presence**. The initiate must step into the tide and **remain there—still, alert, and open**—until the current changes them.

The Current of Forneus

There is no “invocation” of Forneus without emotional availability. He is a being who enters through the space where **truth has no words but is deeply felt**.

This is why his rituals do not call for elaborate props or theatrical declarations. His magic is more intimate. You do not shout for him—you **listen for him**.

He is the one who corrects your posture as you speak.

He is the silence before a difficult confession.

He is the breath between words that holds more power than the words themselves.

He is the undertow that steadies your voice when your past tries to shake it.

He is the ink in the dream you don't remember, writing your true name again and again.

And once you know him, once you are attuned to his frequency—you will never speak the same way again. Your words will carry stillness. Your name will carry weight. And your presence will be unshakeable, even when the world forgets who you were.

An Invitation Beneath the Surface

If you feel Forneus calling, understand this: he does not call the loud. He calls the **ready**.

This course, this 21-day ritual path, is not for performance or display. It is for the **quiet healing of self**, the **restoration of name**, and the **anchoring of power through presence**.

Forneus is not a storm you ride.
He is the depth you descend into—until you find that it was always your own.

Let the tides pull you inward. Let the armor soften. Let your voice return.

The Depthcaller awaits.
