## Is This You?

- **Struggling to meet expenses each month?**

Maybe you feel that despite cutting back, your bank balance never grows. In this course, you'll develop discipline through behavioral finance techniques and set up automated workflows that funnel money into savings and investments before you even see your paycheck.

- **Feeling stuck in your current role despite your potential?**

High performers often plateau because they lack visibility or negotiation skills. We'll teach you how to craft an achievement portfolio, request—and secure—a seat at the table for stretch assignments, and build influence with key decision-makers.

- **Uncertain how to invest wisely to grow your assets?**

The flood of “get rich quick” schemes can be paralyzing. We cut through the noise with a beginner-friendly investing blueprint: how to choose low-cost index funds, set risk-appropriate allocations, and monitor performance without micromanaging.
